

BLOCKCHAIN SUCCESS STORY

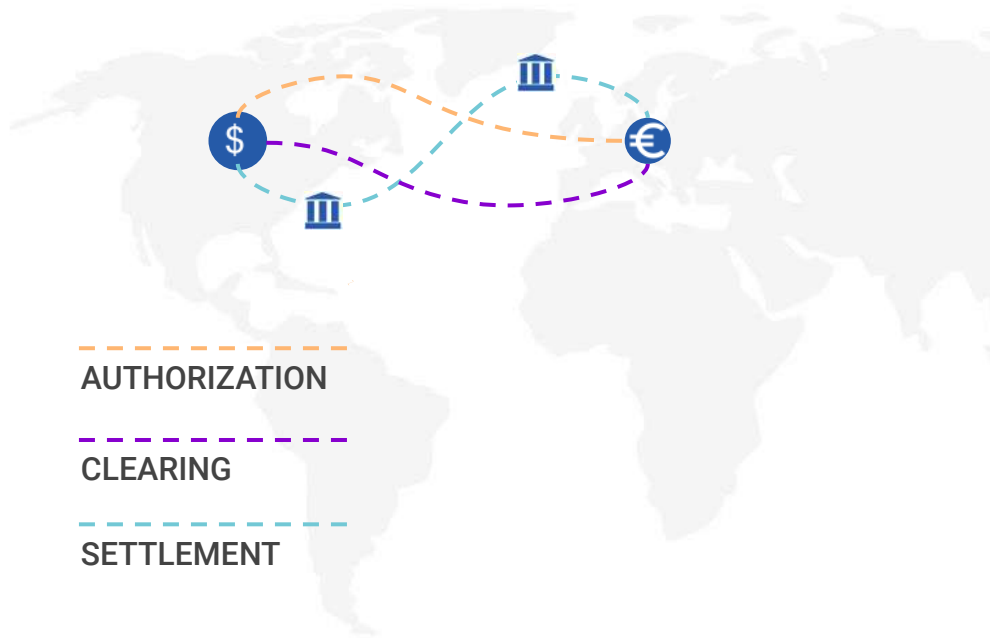

**ENABLING GLOBAL ECONOMIC
OPPORTUNITY WITH A
DECENTRALIZED PAYMENT NETWORK**

FEBRUARY 11, 2020

**THE CURRENT
CONCEPT OF 'MONEY'
IS BUILT UPON
A STRAINED
ARCHITECTURE.**

CURRENT STATE

- Complex conversion processes can take days or weeks to complete
- Authorization, clearing, and settlement occur on different networks and at different times
- High transaction fees are often associated with digital payments
- Little to no transparency in exchange rates, creating market inefficiency and negatively impacting economic prosperity for much of the population

THE OPPORTUNITY

- Simultaneously clear and settle payments on one network
- Transact in near real time
- Create immutable transaction records protected by cryptographic security
- Achieve transparency and create opportunity for fair trade

WHY IT MATTERS

- Access to reliable currency is something that many of us take for granted
- Blockchain is enabling a worldwide financial network that is stable and transparent
- And, it's happening at a fraction of the cost

MEET THE SPEAKERS

JORGE RUIZ

Co-founder & CEO
Air Protocol

ANDREW BRICK

Blockchain Engineer
Object Computing, Inc. (OCI)

NICKI POWERS

Moderator
Object Computing, Inc. (OCI)

This system settles & clears transactions at a minimum of 10 tps, or 200k tpm

Highly decentralized platform means users can transact and participate in a trustless system

High availability & resilience delivers practical value and encourages interoperability

Users protect their savings from devaluation with a network backed by a stable currency

Users can send and receive money anywhere, faster than a bank transfer and with transparent exchange rates

Payment methods are always available, regardless of where users are or what currency they use

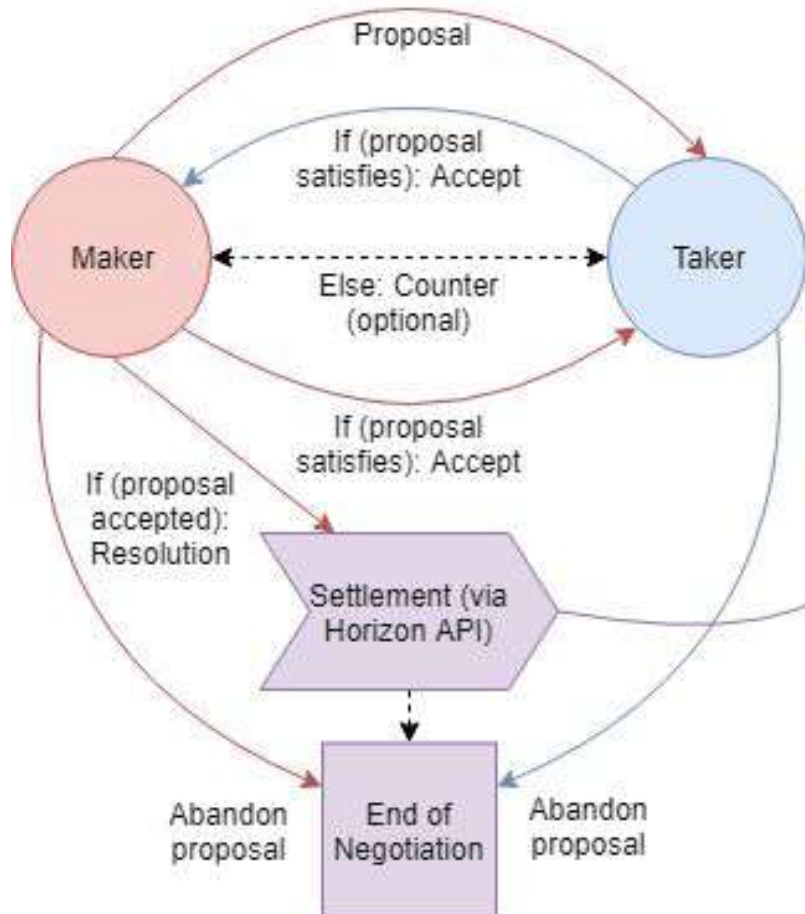

LIVE DEMONSTRATION
